

[Insert title of invention]One Step SMS Message Board and Time Management Tools

Abstract of Disclosure

The present invention provides a process that allows for SMS transmissions to be sent to a Message Board with time management tools such as a "To Do List" and "Reminder" in a typical Calendar Planning software to send the messages to pre-selected wireless devices and to be able to send those message in a delayed transmission. Electronic messages may be transmitted over a wireless connection to or to and from a mobile. For example, electronic messages addressed to a mobile phone may be received by the gateway of the present invention from the Internet, a LAN, or any other source, warehoused until the proper time and routed to the appropriate mobile phone. Such electronic messages may be originated manually or may be automatically generated by specific computer applications, such as a scheduling program operating on a LAN.

Figures

Figure 1: A line graph showing the relationship between the number of figures and the number of pages. The x-axis represents the number of figures (0 to 10) and the y-axis represents the number of pages (0 to 10). The data points are (0, 0), (1, 1), (2, 2), (3, 3), (4, 4), (5, 5), (6, 6), (7, 7), (8, 8), (9, 9), and (10, 10). The graph shows a direct linear relationship where the number of pages increases by one for every additional figure.
